## **AMF CEILING PRODUCTS: MAINTENANCE AND CLEANING.**

Product	<b>Mineral wool ceiling tiles, panels and planks</b>
Manufacturer	<b>KNAUF AMF GmbH &amp; Co. KG, Elsenthal 15, D-94481 Grafenau, Germany.</b>
Designed Use	<b>All products are intended for use as part of specified ceiling grid systems.</b>

**AMF** mineral wool ceiling tiles, panels and planks can be cleaned with a damp cloth containing a mild detergent.

Care must be taken not to wet the ceiling, and it is important that abrasive cleaning agents are not used.

Surface dust should be removed from tiles using a soft brush. If necessary tiles can be re-painted using a standard emulsion paint.

Before painting any surface damage should be repaired using proprietary filler.

Specialist Contractors offer cleaning services, and it is essential that if an AMF ceiling is to be cleaned in this way, a trial should first be carried out to ensure that the result is satisfactory.
