SOHO SERIES

Recognising the need for a fast and easy way to install the popular ‘Soho’ look, Potters recently introduced two ‘stick on’ options for interior partitions. The lightweight aluminium is attached to the glazing with industrial strength adhesive, meaning customers can now achieve the same industrial style glazing look, in a fraction of the time.

The Soho series is extremely versatile can be positioned on the glazing panel in a variety of ways. There are five profiles in total, capable of combining with our other suites to deliver unique solutions for the office that’s on trend.

The Soho Series consist of two 35mm options; A-Frame Bars and Flat Bars, both of which are intended to complement the visual appeal of Aluminium Partition Suites and Doors. Soho is designed to provide an artistic feel to the suites and are not necessary to strengthen the structure of the partitioning in situ.

HOW TO INSTALL THE SOHO SERIES

- Plan and design the layout of your Soho look
- Designed to be back to back in line with each other, so that the pieces are not visible on the other side
- Place 18mm double-sided tape onto the Soho surface
- In addition to the tape, we recommend placing polymer adhesive and sealant close to both ends of the trim and on every lineal metre. This creates a high bond hold which reinforces the weak points to ensure that it does not peel
- Place the Soho pieces on the glazing panel to create your desired look
