#### Relevant Building Code clauses:

B1 Structure: Performance clauses B1.3.1, B1.3.2, B1.3.3 (a), (b), (c), (f), (h), (i)\*, (l), (m) and B1.3.4 (a), (b), (d) B2 Durability: Performance clauses B2.3.1 (b) (i), (ii), and B2.3.2

C3 Fire affecting areas beyond the fire source\*: Rondo framing members and connections can be used in lining manufacturers proprietary "Fire rated systems" that are designed to limit the spread of fire by providing passive fire-resistance to ensure high probability of life safety and adjacent property protection.

\* = When used as part of a tested and approved system

### Statement on how the building product is expected to contribute to compliance:

Ceiling members and connections are designed in accordance with AS/NZS 4600:2018 Cold-formed steel structures to resist the vertical and horizontal design actions assessed for the relevant load combinations nominated in AS/NZS 1170.0:2002 Structural Design Actions – Part 0: General Principles.

Minimum requirements for the design comply with AS/NZS 2785:2020 Suspended Ceilings – Design and Installation. Rondo provides a 15-year structural system warranty which complies to Clause B2-Durability for non-structural building elements that are moderately difficult to access and replace.

C3 Fire affecting areas beyond the fire source: Lining manufacturers design and test their Fire Rated Systems which can be used to provide passive fire protection in accordance with the requirements of NZBC Clauses C1 - C6 – Protection from Fire. Rondo framing members and connections can be used as the support framing in many of these systems. Refer to lining manufacturer for further details.

- options for compliance set out in section 19 of the Act (regulations, acceptable solution, verification method)
- standard or technical document that describes the performance of the building product or the relevant specifications to which the building product was manufactured
- physical properties of the building product
- how the building product is intended to be used.

## Limitations on the use of the building product:

It should be noted that Rondo products do not satisfy code requirements on their own, but deliver code compliant performance when used as part of full ceiling system, installed in accordance with specific Rondo technical literature. Rondo Xpress Drywall Grid Systems are intended for internal, non-trafficable applications. Not suitable for indoor pool environments without detailed review of application by Rondo.

Design requirements that would support the a	appropriate use of the building product:
the building code, to ensure the design is compli	btain a design that is specifically customised to your project requirements. This
Installation requirements (also provide link to the	product installation guide):
	by a qualified trades person and according to the relevant building codes and o.co.nz), in conjunction with the specific project design.
Maintenance requirements (also provide link to the	ne product maintenance guide):
There are no specific or periodical maintenance installation requirements listed above.	requirements for this system when installed in accordance with the design and
